

4th Local Consensus Building Event

During the Annual NANOSENS Conference 2010

December 2nd & 3rd, 2010 at the TechGate in Vienna

ecoplus. The Business Agency of Lower Austria. Ltd. and the Austrian Academy of Sciences – Institute for Integrated Sensor Systems represented the Project “Promoting Innovation in the Industrial Informatics and Embedded Systems Sectors through Networking” as an Exhibitor Medium at the 2010 NANOSENS Conference in Vienna which allowed us to reach approximately 130 delegates via distributing the project folder prepared in each delegate bag (please see attendee list for the exact number of participants) and we were able to network as well as to reach valuable input for the Strategic Research Agenda, which poses one major output of this present EU-Project at hand.

Furthermore, as representing I3E (“Promoting Innovation in the Industrial Informatics and Embedded Systems Sectors through Networking”) at this Conference as an Exhibitor Medium also present at the Fair Facilities with a both presenting the project with Project Folders, a A0- Poster showcasing the process on how the I3E- Project Consortium will use the input gained through all the various Local consensus building meetings incorporating it into the Strategic Research Agenda giving an important milestone in the project’s life.

To sum up, the representation of the EU-Project I3E was successful as we were able to increase our visibility through participating as exhibitors at an important Austrian Conference with important delegates from the named fields of specialization.
